Homo sapiens neanderthalensis

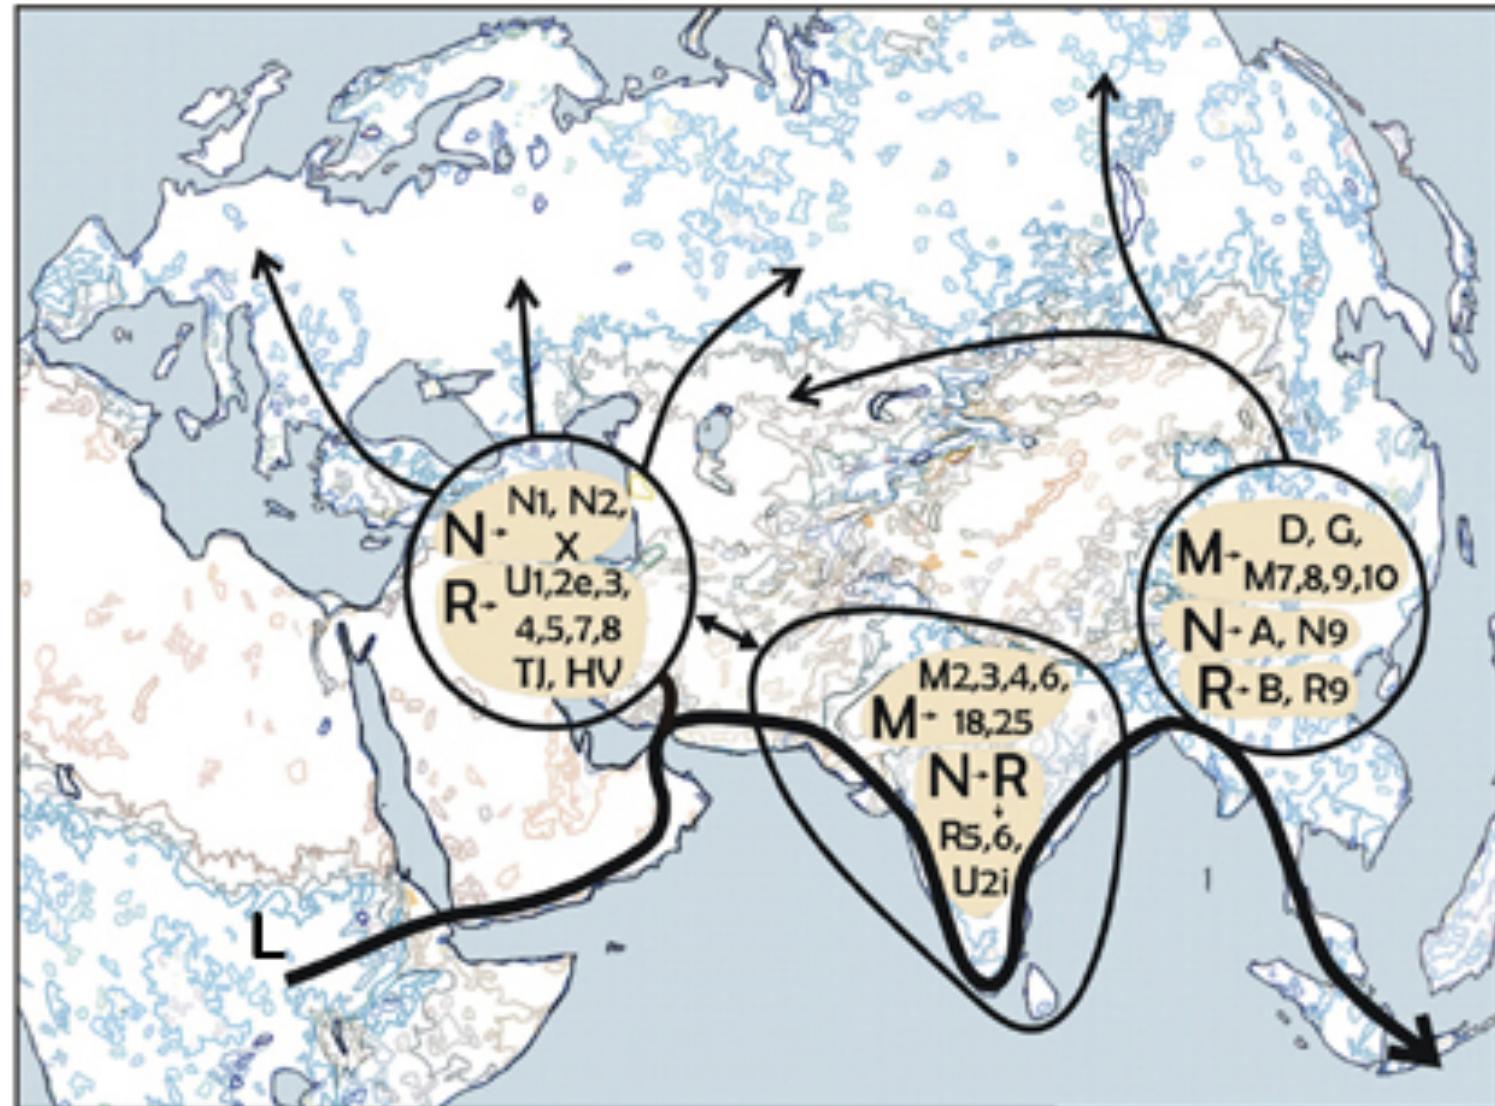

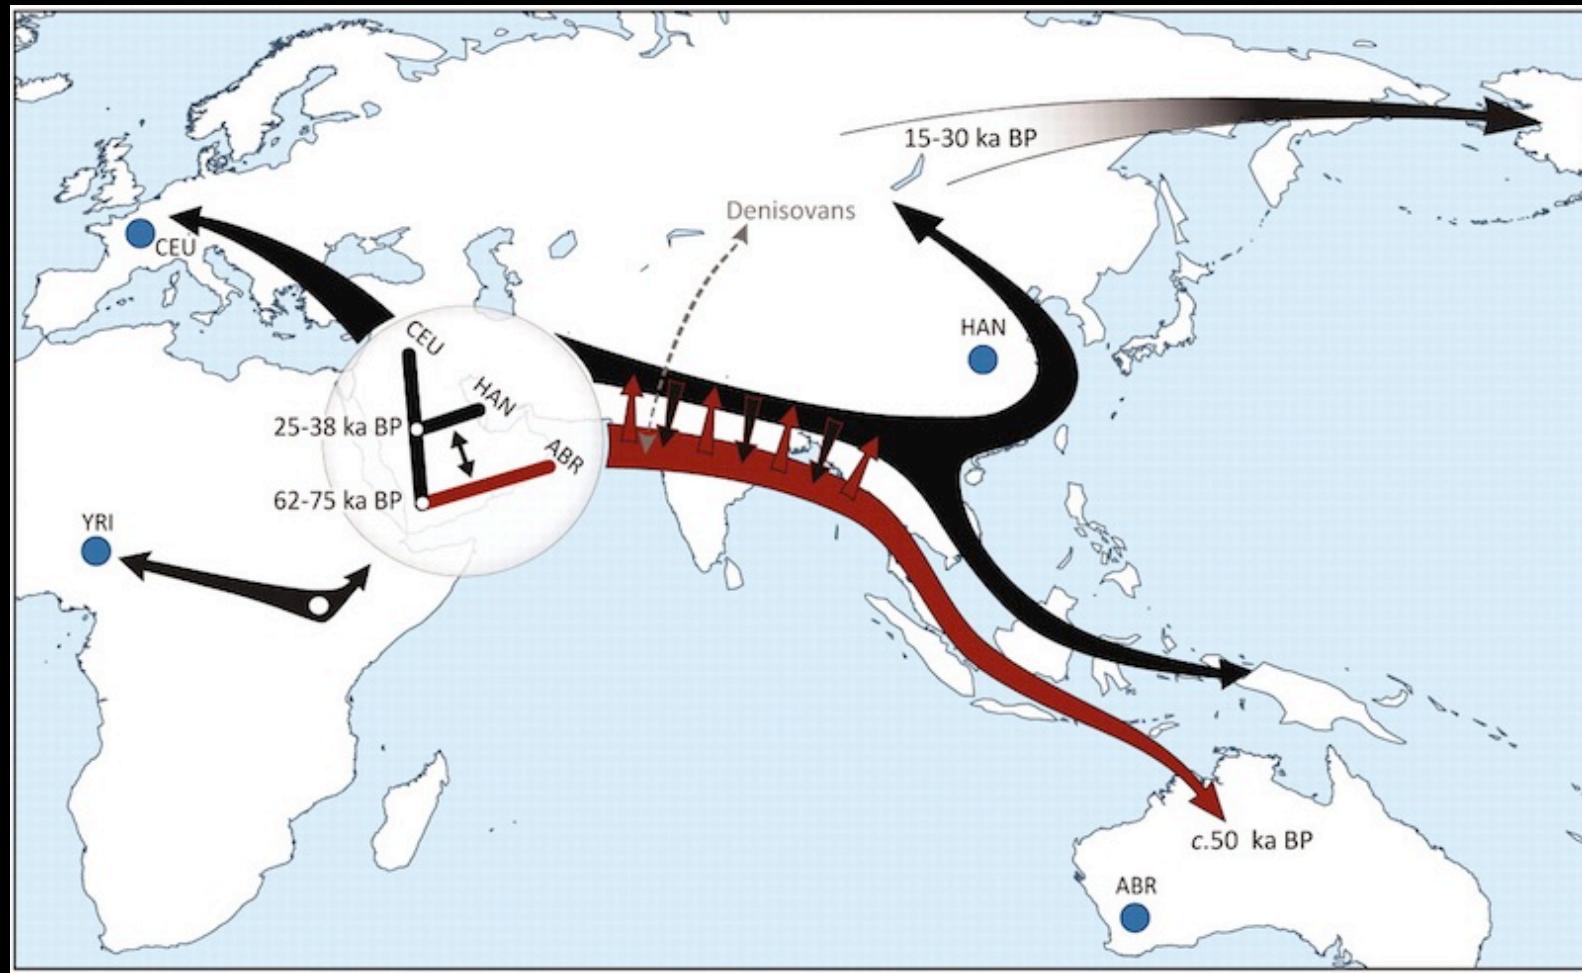

Figure 5. Peopling of Eurasia. Metspalu, Kivisild et al 2004

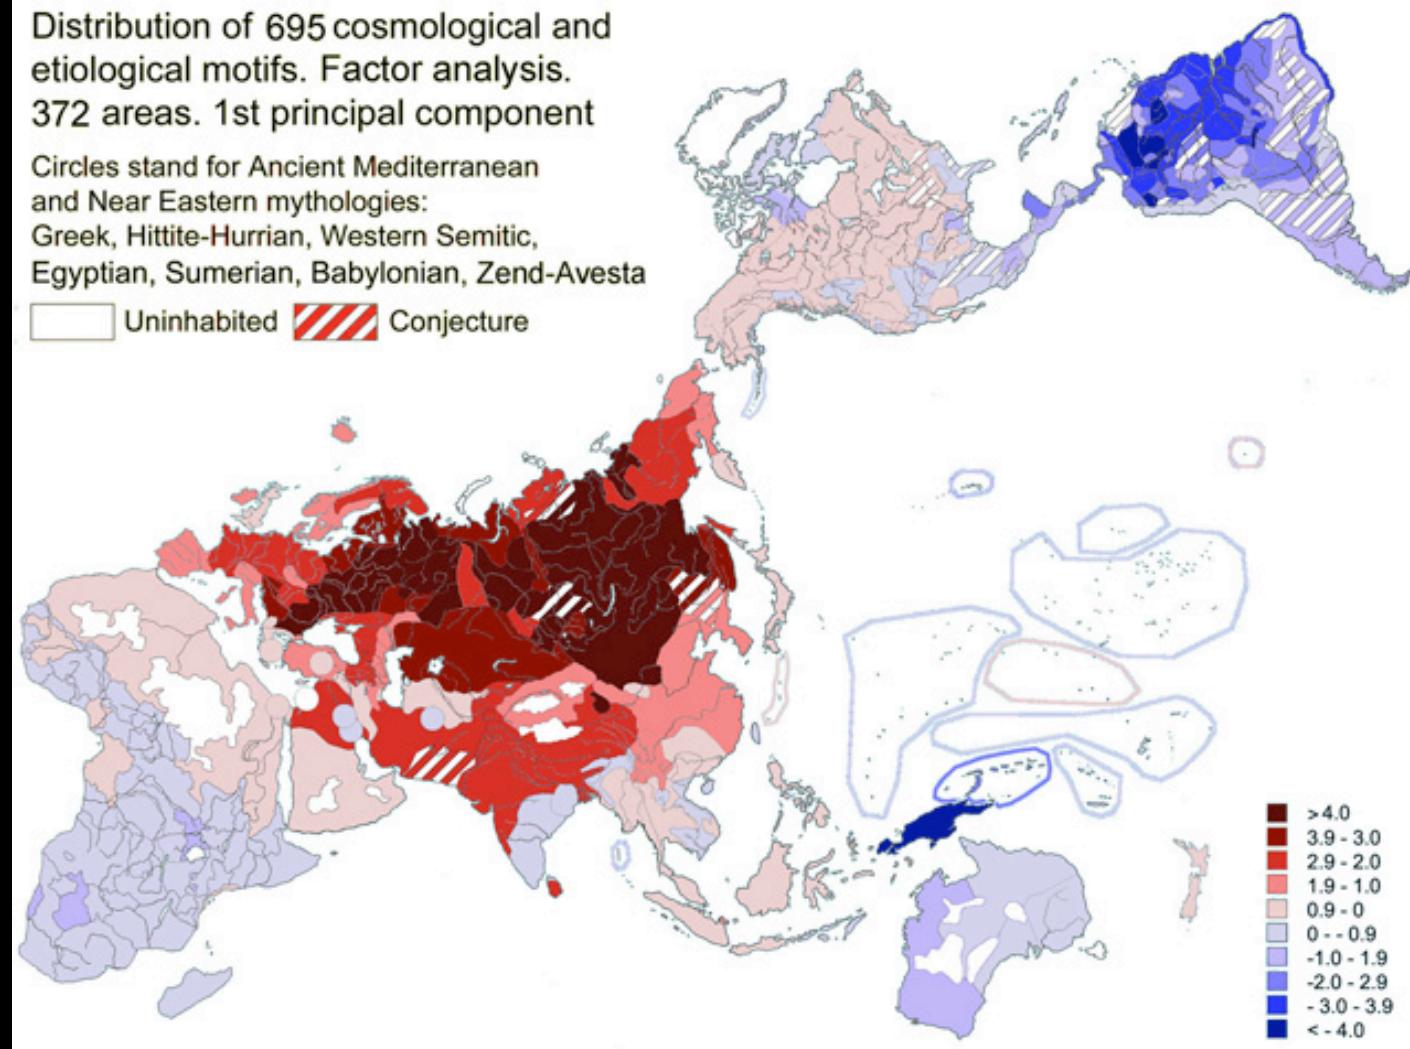

*Two *Homo sapiens sapiens* dispersal routes to SE Asia – 2011 – ? M and N → R*

Rasmussen, M., et al. 2011. An Aboriginal Australian Genome Reveals Separate Human Dispersals into Asia.
Science 334, 6052: 94-98; Fig. 2.

Distribution of 695 cosmological and etiological motifs. Factor analysis.
372 areas. 1st principal component

Circles stand for Ancient Mediterranean and Near Eastern mythologies:
Greek, Hittite-Hurrian, Western Semitic,
Egyptian, Sumerian, Babylonian, Zend-Avesta

Uninhabited Conjecture

Berezkin, Y. *The emergence of the first people from the underworld: another cosmogonic myth of a possible African origin*: p. 2. Accessed online 08 2010.

3rd Meme of the Evolution of Art, Symbol & Myth

Era and Techné	3 rd Meme: <i>Mythic I & II</i> = archaic <i>Homo sapiens</i> & <i>Homo sapiens sapiens</i>
<p>Middle Paleolithic / Middle Stone Age EMP ~300 to 40 ka MMP ~150 to 60(100) ka LMP ~60 to 30/35 ka</p>	<p>Mythic I: 'Gaia' (M. Witzel) = Khoisan mythologies (pre-MP?)</p> <p>Mythic II: = 'Gondwana' (M. Witzel) = 'Southern Route' Africa to SE Asia & Australia = Australian Aboriginal mythologies</p>

Homo sapiens sapiens Culture by Myth Stage

Region	Toolkit	Mythology	Art & Religion	Macrolanguage
East and South Africa (Khoisan) L0; L1; L2-mtDNA	Final Acheulian Mode II and/or Early-Middle Paleolithic / MSA Mode III	Mythic I 'Pan-Gaea' (M. Witzel)	<i>Life-Giver vs Death-Wielder</i> <i>Spirits of the Dead return to Life-Giver</i> <i>Extraction Healing Dance</i>	Proto-Sapiens (// Khoisan)
'Southern Route' SW Asia to Sunda-Sahul L3'MN; ? N-mtDNA → R, U, JT, B, P/O	Mid-Middle Paleolithic / MSA Mode III	Mythic II 'Gondwana' (M. Witzel) 'Indo-Pacific' (Y. Berezkin)	<i>Beings of the Dreaming shape-shifters</i> <i>Creator/Creatrix of lifeforms increase ceremonies</i> <i>mortuary deposition and soul journey</i> <i>landscape art</i> <i>geometric markings image representation</i>	'Borean-R' (SW Asian Afroasiatic, Pre-Dravidian, Macro-Pama-Nyungan, ? Munda, ? Kusunda Isolates; ? Austric; B-Amerind)
Eurasia, Americas Africa N-mtDNA → Ns and S, Y, X, A and M-mtDNA → Ms, D, C and G	Upper Paleolithic / LSA Mode IV	Mythic III 'Laurasian' (M. Witzel) 'Eurasian' (Y. Berezkin) 'Shamanism'	3x2=6 Worlds, Journeying Vision Quest Master and Mistress of Animals; psychopomp UP(E) arrays of female and male spiritual transformations geometric protolanguage	'Borean-N' = Burushaski-Caucasic-Dené, Sino-Tibetan and 'Borean M' = Pre-Eurasian (Altaic, I.E., Japonic-Ainu, C and D-Amerind) (H. Fleming, S. Starostin)

Meme #3 Mid-Middle Paleolithic: Mythic II

Predominant symbolic behaviors and derived theatics

- **Use of pigment/ornaments:** red and black ‘conjunction of opposites’; ? body painting, pendant ornaments
- **Stone/Bone/Tool arrangements:** ‘Mandala spaces, 4+ directions, laterality L versus R, color opposites’
(spheroid piles, El Guettar, red, black, white color, geometrics, point; spheroid pile, Windhoek; Bruniquel cave large oval space, ‘ritual space’)
- **Mortuary practices: defleshing, secondary ‘burial’, deposition of dead in rock shelters and caves:**
‘Return-to-home’, ‘womb’; ‘going-to-where-I-will-die,’ ‘negative capability’ (to be in state of waiting, dormancy, hibernation, incubation, pre-emergence, prior to sunrise, before-the-beginning, not-knowing yet healing; flesh, embodiment as negative capability)
(Regourdou burial with bear bones; European MP ‘bear skull’ depositions, Rece Cave, 4 bear skulls (4 directions?); Cioarei-Borosteni Cave, 2 bear skulls back-to-back E-W, 1 bear skull framed by triad of nucleus, scraper, point; (compare alchemical *cauda pavonis*; Taoist ‘uncarved block’; Nagarjuna: state of the ‘not-born’ and the ‘unceasing’ of time; Bracha Ettinger: the matrixial, co-poiesis as revision of Martin Buber ‘I-Thou’)
(African MSA ‘hyena’ as crusher and devourer of all bones, being totally consumed into death)
- **Marking traditions:**
 - Cupules: ‘gathering-into-being-here’, ‘opacity of suffering’; ‘sound of silence’; ‘contact and be alone with reality of finitude’; powder as ‘residue’ (motif, compare Aboriginal increase ceremony: cupule powder on zoomorphic rock yields increase; motif, compare alchemical *Sal*, rust and salt, the residue, remnant as messianic hope) (La Ferrassie; multiple sites from Africa to India to Australia)
 - Crisscrossing, grid lattice and digital fluting : ‘reciprocity, exchange, interconnectedness’, ‘the order of relationships and all life-forms’, ‘the law of prescription/proscription + ‘intergenerational transmission, continuance of life’ (Blombos X’s, crisscross grid; Koonalda, digital fluting and grids; Champlost crisscross; etc.)
 - Cross: ‘coincidentia oppositorum’ (Tata, ‘cross’ incised on nummulite circular disk)
- **Image and representation:**
 - Geometric Figurines, especially the ‘Triangular Female Creatrix, Birth-Giver’; triangular, pentagon, hexagon-shapes; ‘creator beings, female or male or androgynous, of landscape and all life forms and thus intimate community and communion of all peoples and life forms’ (Quneitra, Tabun B; Mousterian of Acheulian Tradition, Har Karkom; HW Site, Surrey UK, MTA) (JBH: three dreams of Har Karkom, biface signifies ‘make peace’)

Note: MP ≠ Shamanic (Laurasian) theatics, such as cave as ‘place (container) of emergence/rebirth of animals’; ‘master/mistress of animals’; ‘bear cult’; ‘vision quest’, but theatics more like ‘purification’ and ‘reduction to bone’ (Eliade)

Middle Paleolithic / Middle Stone Age Palaeoart

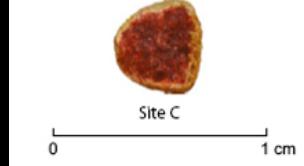

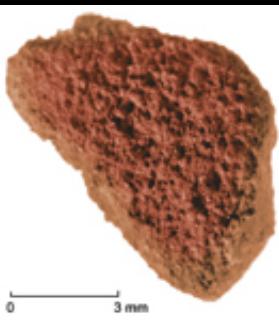

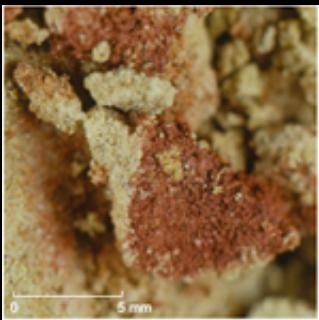

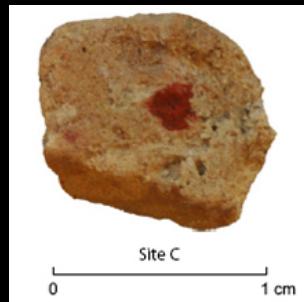

Biface, Middle Paleolithic, Netherlands

Twin Rivers Kopje, Zambia, A-block, ~265 ka, MSA Lower Lupemban

A-block (mean ~265 ka) and F-block (140-200 ka): 306 specularite, hematite, limonite, manganese dioxide pieces, some evident striations for powder; brown, red, yellow, pink, purple, blue-black; manganese and huge quantity suggest ritual use (*Barham 2002*); pestlestone with hematite stain on working surface (*Clark 2001*)

L: hematite crayon; R: limonite crayon. Images: Chip Clark, Smithsonian Institution

Maastricht-Bélvèdere C, River Maas, Netherlands, MIS7 ~230ka or 9 ~320 ka, Early Mousterian

Site C, 15 small concentrates of red hematite pigment, bright-red, yellow-brown, grayish-olive; drops originally spilled from liquid solution. Top L: flint flake next to hematite concentrate; Bottom L: two largest concentrates; R: drops taken as samples (Roebroeks, Sier et al 2012: Fig. 2, 1 and SI4, respectively)

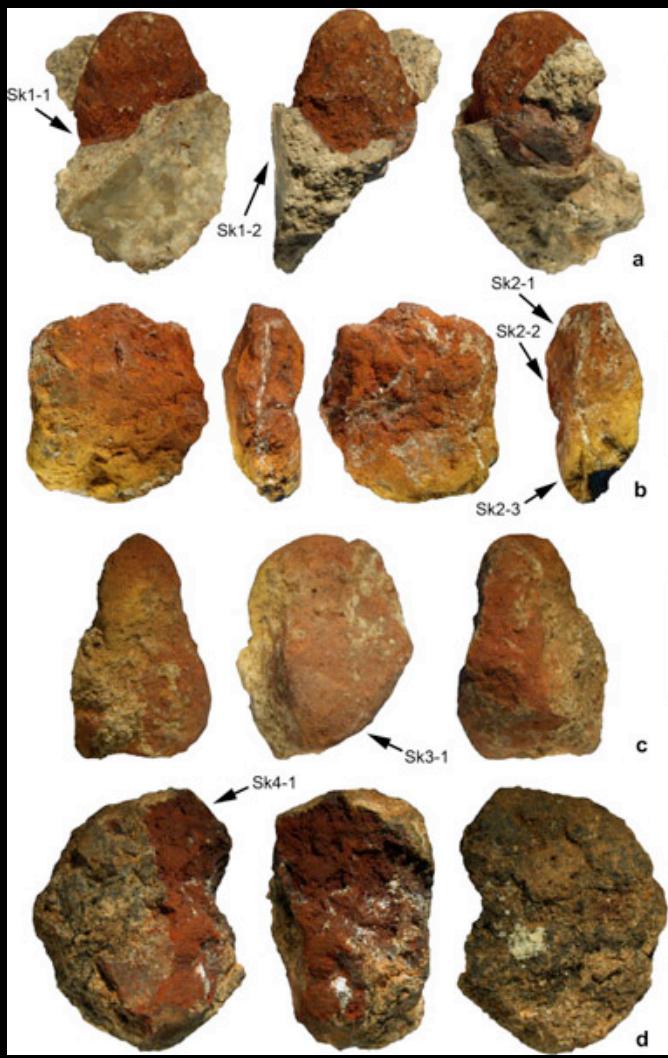

Fig. 5. Pieces of porcellanite found in the Bečov I dwelling (layer A-III-6 – Early Mousterian).

Fig. 6. Experimental rubbing of weathered porcellanite.

Becov I, Czech Republic, ~200-220 ka, Early Mousterian

- 4 polished quartzite tablets / anvils, one over 0.5 m, which served as pallets for mixing pigments, along with large quantities of porcellanite in diverse shades (yellow, orange, red), with traces of heat treatment (to soften the stone), replication experiments indicate purposeful grinding for pigments; (Fridrich 1976) (Šajnerová-Dušková, S., Fridrich, J. and Fridrichová-Sýkorová 2008: Fig. 5 and 8)
- Red ochre, use striations (*WE1985*); striated on 2 faces, marks of abrasion, occupation floor stained with ochre in same area, flat rubbing stone (*AM1981*)
- Polished, round sandstone object (6.85x5.56x4.5cm), interpreted as human head with neck parts of shoulders

Skhul B, Israel, MIS5e(c-e) ~100-137 ka, Tabun C Middle Paleolithic

4 fragments and small pieces of red and orange pigment,
heated to at least 300°C, changing yellow goethite to orange and red hematite

Fig. 1 Pieces of pigment, with locations of analyzed samples (d'Errico, Salomon, Vignaud & Stringer 2010: Fig. 1)

Black Colorants, Le Moustier, Dordogne, France, Level G and H ~45-50 ka

L top: W 24.5 cm, calcite plaquette, level G (excavation D. Peyrony), edge retouch, central depression natural, deposit black or locally grey; bottom: LMP1-4, samples taken for analysis of colorant; black manganese dioxide (M. Lorblanchet). R: top and bottom: nodules of black colorant, LMH1-2 top, LMH3 bottom; bear artificial striations, polish, incisions and natural striations (M. Lorblanchet)

Collection: Musée National de Préhistoire des Eyzies.

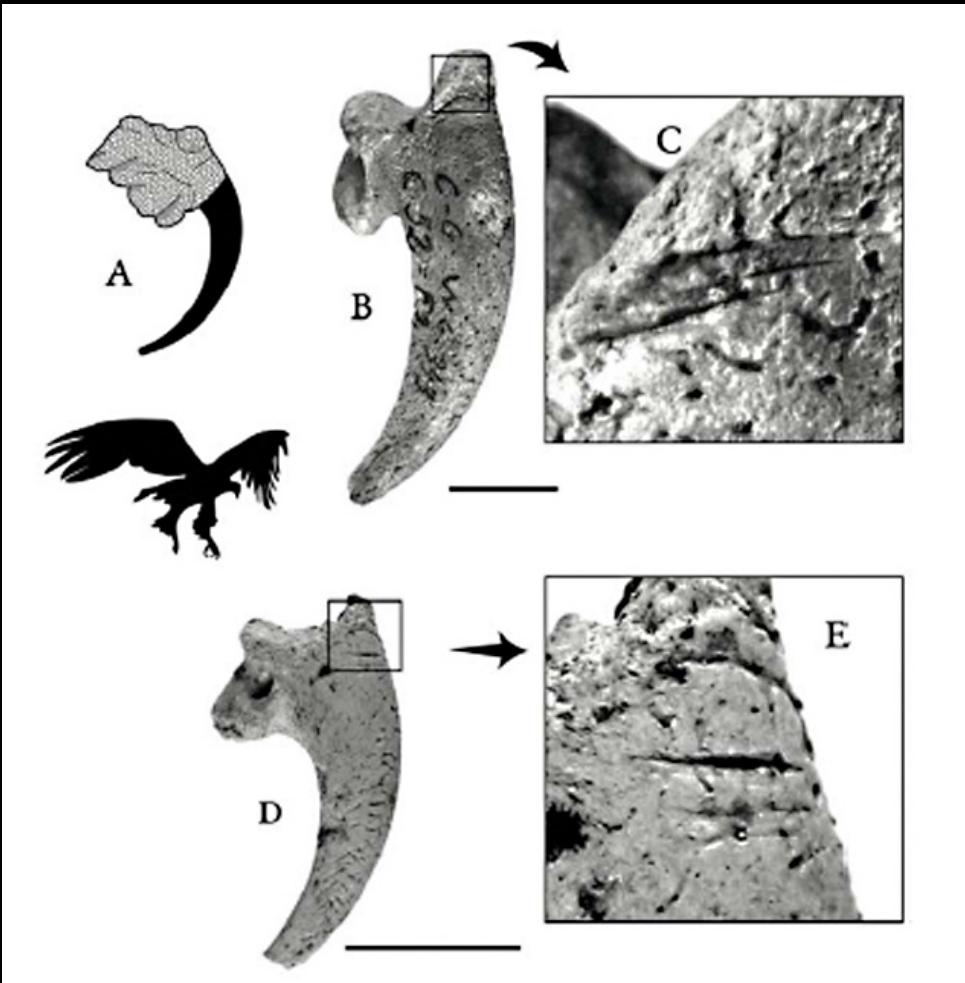

Photos and transcription: Lorblanchet M. 1999. *La Naissance de l'Art*: p.108, 138. Paris: Éditions Errance)

Neanderthal pigment stained shells and perforated shells, Spain, ~50 ka

Top: perforated pigment stained marine shells, yellow geothite and red hematite
Cueva Aviones, SE Spain, ~45-48 cal ka, Mousterian, Neanderthal

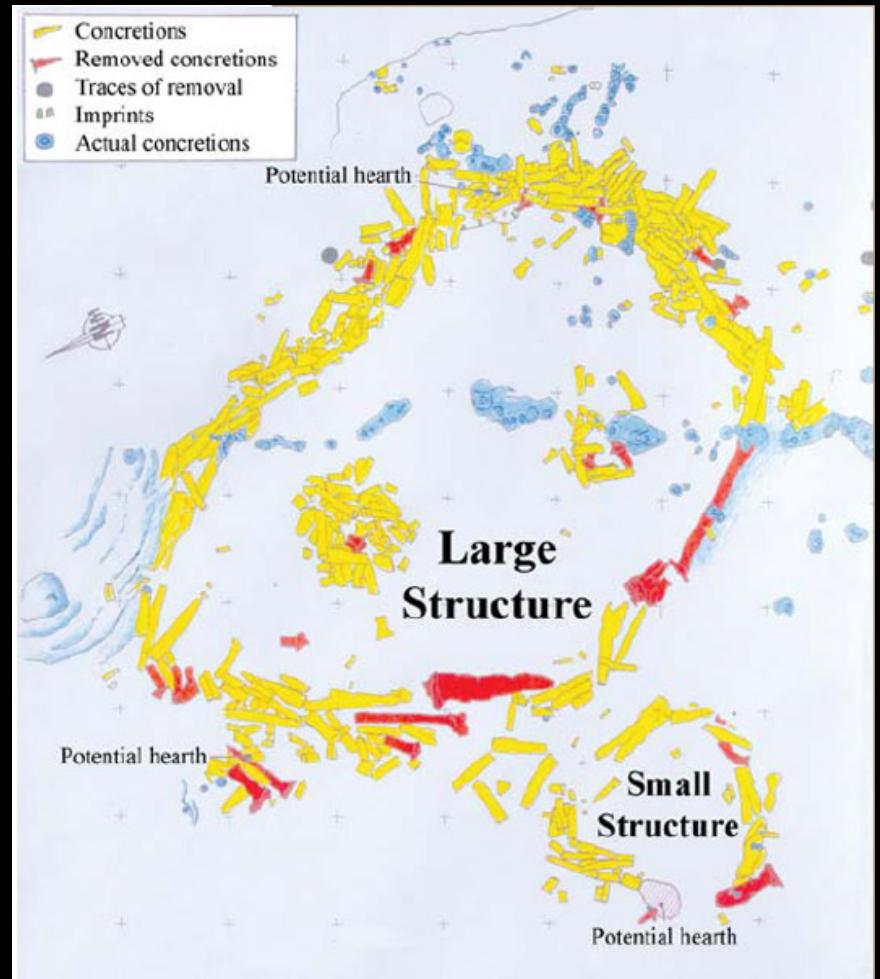

Bottom: perforated Pecten shell painted on external white side with orange pigment mix of yellow geothite and red hematite, Cueva Antón, SE Spain, 43.5 cal ka; Zilhao et al 2010.

Neanderthal eagle talons, Typical Mousterian, L 52, Combe-Grenal, France ~90 ka and Les Fieux, France ~40-60 ka

A: example of fully fleshed golden eagle digit; B-E: cutmarked terminal phalanges;
B-C: Combe-Grenal, L 52, golden eagle; D-E: Le Fieux, L Jbase, white tailed eagle

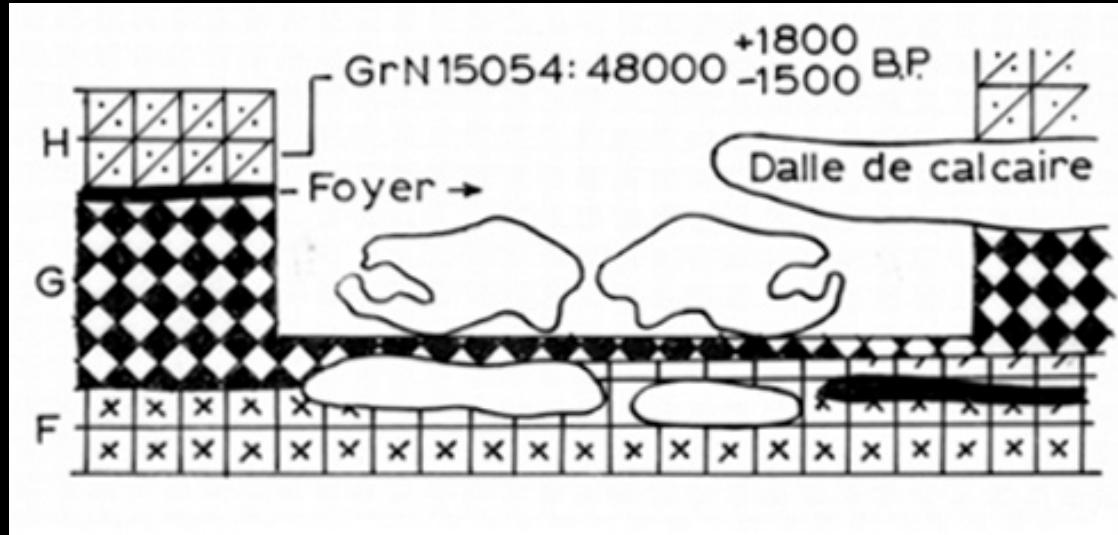

Morin E, Laroulandie V. 2012. Presumed Symbolic Use of Diurnal Raptors by Neanderthals. PLoS ONE 7,3: e1-5: Fig. 2.
Combe-Grenal, Typical Mousterian, L 50, ~62 ka, 1 adult, cranials, 1 child, mandible, cutmarks = defleshing, deposition
(Le Mort F. 1989)

Neanderthal 'Ritual Space', Bruniquel, France >47.6 ka

Oval 5x8m, multiple hearths; 1 burnt bear humerus inside; no tools or habitation, 250m inside cave

L: Rouzaud 1997: photo 1; Balter 1996. R: Fig. Rouzaud, Soulier, and Lignereux, in J. Clottes nd, 'symbolic or ritual space')

Neanderthal 'Bear Cult', Cioarei-Borosteni Cave, Carpathians, Romania

R: top-cut stalagmite receptacles with ochre stains, Level E, 52 ka but biostratigraphy OIS5a >80 ka
 (Carciumaru, Nitu & Tutuianu-Carciumaru 2010: fig. 5)

L: two crania Ursus spelaeus discovered situated back-to-back, almost touching, and oriented on an East-West axis,
 LG (>) 49.5 ka (Carciumaru, Nitu & Tutuianu-Carciumaru 2010: fig. 10)

Neanderthal 'Bear Cult', Rece Cave, Carpathians, Romania, 75-95 ka U/Th calcite cover
(^{14}C ~40 Ka)

Four crania *Ursus spelaeus* with 'an extremely curious disposition' (Carciumaru, Nitu & Tutuianu-Carciumaru 2010: fig. 11)

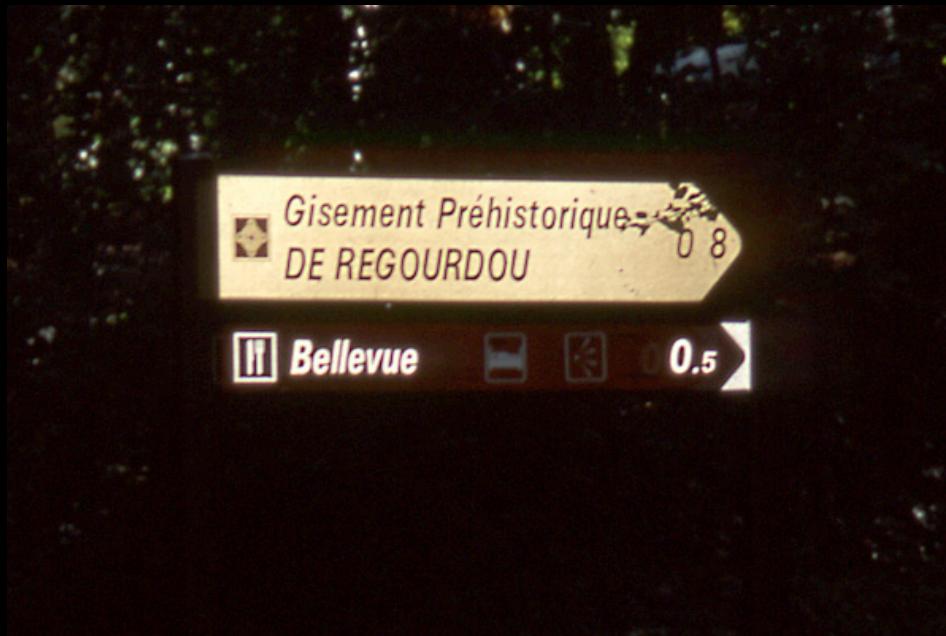

Photo: James Harrod, 2001

Neanderthal 'Bear Cult', R1 Burial IVa, Regourdou, Dordogne, France, 75-135 ka

Quina and Ferrassie Mousterian tools. Adult male, burial, left side, highly flexed, under 'paving layer' and cairn of boulders; with possible grave goods: 2 brown bear tibia; capped by layer of burnt sand and ashes, flint tools (nucleus, scraper, flakes) and additional bear bones and bear teeth and deer bone (Jaubert, Maureille & Turq 2010); (or) evidence body lay on bear hides; deer antler on top of burial mound, covered with another layer of stones and capped by remains of a small fire; next to IVC, incorporating brown bear bones and large stone cap; and IVB 2x2m limestone slab over near-complete young brown bear skeleton; deposited before and after the burial; and a rectangular stone lined pit with 20 bear skulls and red ochre, covered with stone slab (Bonifay & Vandermeersch 1962; Bonifay 1965; Pettitt 2011: Fig 5.9)

Neanderthal 'Bear Cult', R1 Burial IVa, Regourdou, Dordogne, France, 75-135 ka

Quina and Ferrassie Mousterian tools. Adult male, burial, left side, highly flexed, under 'paving layer' and cairn of boulders; with possible grave goods: 2 brown bear tibia; capped by layer of burnt sand and ashes, flint tools (nucleus, scraper, flakes) and additional bear bones and bear teeth and deer bone (Jaubert, Maureille & Turq 2010); (or) evidence body lay on bear hides; deer antler on top of burial mound, covered with another layer of stones and capped by remains of a small fire (Bonifay & Vandermeersch 1962; Bonifay 1965) Photo: James Harrod, 2001

'Ritual stone', Neanderthal 'Bear Cult', R1 Burial IVa, Regourdou, Dordogne, France, 75-135 ka
