Multi-Stage Parallel Processing Model

Drawing on Mithen and Donald, this model of the evolution of the 'mind' differentiates the development of multiple intelligence modules (domains) from the parallel development of representation modes ('mental models of the world,' meta-representations, 'cross-mapping,' 'cognitive fluidity').

	<u>Modular Intelligences</u>	<u>Mental Modeling of World & Representation</u>
Apes/Australop. -	Expanded social module	Perceptual Situational Model of the World
Habilines -	New technical module (as accidental art/symbol) Expanded foraging module scavenging niche, waterine Expanded social intelligence (accidental menstrual synchrony, accidental band aggregation sites)	Imitation Modeling of the World mimetic modeling: mime - dance - gesture group ritual; deictic gesture: pointing? come / goaway / stop / iterate, continue, go; modulated vocalization; rhythm (L-brain); prosody (R- brain)
Homo erectus -	New distribution module? (extended group meat sharing) New artistic-spiritual module (symmetry shaping; passage; 1st color symbolism? $\diamond = \diamond$ as intentional art/symbol) Expanded foraging module (hunting and scavenging niche natural history for diaspora) Expanded social intelligence (alliances? 1st moieties? 1st gender solidarity 'symmetry'?)	Conceptual-Meaning-Gesture Modeling of the World: 'artistic-conceptual-gesture' modeling + symbolic representation, incl. iconix and metaphorix; activating 'reference'; gesture movement prescencing; fetish meaning; 'symbolic memory controller' + ext.storage
Homo archaicus -	New language intelligence module (first signs) (\diamond + animal, female, head combi's, 4-in-One representation)	Abstract Idea Modeling of the World 'abstract idea modeling' + first sign representation; meaning and reference ('pre-linguistic') 'linguistic controller'; L-brain: Broca-Wernike language - L-brain metaphor - R-brain;
Sapiens sapiens -	Reorganization of brain entraining 'deep instincts' (neocortex, limbic motor rhythmic systems): creativity, ceremony, justice, love; rules of 'blood relations' Expanded language module Expanded social intelligence module (moieties + totemic units; ceremonial aggregation sites) Expanded artistic-spiritual module ($\diamond : \diamond :: \diamond : \diamond$ as group analogic structure)	Mythic and Linguistic Modeling of the World 'mythic,' 'linguistic' modeling: symbol systems, narratives, myths; capacity to innovate new signs and make predictions based on signs, using analogic analogic and cross-mapped matrices + external memory via oral tradition and iconography
